

# PENREN/C this Week

February 2, 2004

## The Transition is Complete!

The **Pentagon Renovation Program (PENREN)**  
is now called the  
**Pentagon Renovation & Construction Program Office.  
(PENREN/C)**

*The name change will not affect our core mission or the level of service building tenants have come to expect from our organization.*

*Details on the name change and re-organization can be found in the latest issue of **The Renovator**, now available for download at <http://renovation.pentagon.mil>*

## Wedges 2-5 Renovation

Wedges 2 through 5 encompass 4.5 million square feet of Pentagon space to be renovated by 2010.

**A photo showing the progress of furniture installation in the enhanced basement space. Meanwhile, demolition continues on the next phase of Wedge 2 (inset).**

*More info on this project can be found at:  
<http://renovation.pentagon.mil/wedge2-5/projects-W2-5.htm>*

## Intake/Outfall

A new intake water line will supply condenser water to the Pentagon air conditioning chillers and the outfall line dispenses warmed condenser water into a local waterway.

## A Surprise at the Intake Channel...

**During the recent dredging activities at the Intake Channel, crews removed a six-foot anchor from Boundary Channel Lagoon.**

*More info on this project can be found at:  
<http://renovation.pentagon.mil/projects-IO.htm>*

Pentagon Renovation & Construction Program Office

## "MEET THE RENOVATORS"

### Susan Kasun, Partner Integration Manager

Susan is the Partner Integration Manager (PIM) for the Pentagon Athletic Center, Air Force, and AOC. PIMs are responsible for facilitating communication between the Agencies, the individual sitting Tenant groups within the Agencies, PENREN/C and the design/build team. Susan joined the program with 17 years of interior design experience.

*In her own words: "The PIM's role is dynamic, and therefore never boring. PENREN/C has allowed me to apply my skills in ways I would have never imagined."*
